

William Barents

Senior Frontend / Full-Stack Engineer

Senior Frontend with 5+ years of experience building and operating production-grade SaaS and fintech systems for international teams. Strong expertise in Angular and TypeScript, with proven end-to-end ownership of security-sensitive dashboards, API integrations, and cloud-based backend services (Firebase, Secret Manager). Trusted to work on systems involving real users, real data, and real operational risk in remote, fast-paced environments. Available immediately for remote roles.

INFORMATION

Nationality: EU / ZA

EDUCATION

IT Academy - Cape Town, South Africa

Microsoft Certifications (2018)
2011 - 2016

- Microsoft Certified Professional (HTML5, JavaScript, CSS3)
- MTA Database Fundamentals

Bryanston High School - Johannesburg

National Senior Certificate

EXPERTISE

Frontend: Angular, TypeScript, JavaScript, HTML5, CSS3/SCSS

Frameworks: Angular, React

Backend/Cloud: Firebase (Auth, Firestore, Functions), REST APIs

Tools: Git, Docker, DigitalOcean, Google Analytics.

LANGUAGE

English (Fluent)

Dutch (Basic)

WORK EXPERIENCE

Founder & Chief Technology Officer 2025 – Present Zyneera - Self-employed (South Africa)

- Founded and led development of a multi-tenant SaaS platform for event procurement and management, serving planners and vendors within a unified ecosystem.
- Architected a scalable full-stack solution using React and Firebase (Firestore, Cloud Functions) with real-time data synchronization.
- Designed and enforced RBAC and secure authentication (Firebase Auth) for multi-tenant access control and user lifecycle management.
- Built core platform systems including real-time messaging, ticketing/workflows, and subscription-based feature gating.
- Integrated Paystack for payments, subscriptions, and payouts, and Resend for transactional email infrastructure.
- Structured scalable Firestore data models optimized for performance and efficient querying.
- Led the full software lifecycle from architecture through deployment and continuous iteration.

Senior Frontend Engineer 2023 – 2026 MCE Group - Contract | Remote (Netherlands)

- Owned frontend and backend delivery of a production financial dashboard that enabled teams to securely manage API keys, wallet addresses, trade data, and analytics, improving operational visibility and reducing manual handling of sensitive data.
- Designed a secure credential management model using Google Secret Manager with strict separation of secrets and application data in Firestore, significantly reducing security risk and simplifying compliance requirements.
- Integrated multiple exchange APIs, including custom integrations for unsupported exchanges, and implemented IP-NAT VPC networking to support IP-restricted API access, unlocking access to previously unavailable data sources.
- Built wallet balance monitoring and token price tracking using blockchain data providers, allowing teams to track asset exposure and react quickly to balance changes.
- Implemented configurable balance alerts with email notifications, enabling proactive operational monitoring instead of reactive issue handling.
- Designed and enforced role-based access control (RBAC), giving administrators the ability to manage users and revoke access instantly, improving security and internal governance.
- Developed and maintained Telegram bots to support operational workflows, monitoring, and notifications, streamlining day-to-day operations and reducing reliance on manual checks.
- Collaborated closely with product, leadership, and stakeholders from early ideation through production deployment, ensuring technical decisions aligned with business needs and delivery timelines.

Youwe - Freelance | Remote (Netherlands)

- Worked in a fast-paced Agile environment, collaborating closely with designers, product owners, and backend engineers to deliver production features on tight sprint cycles.
- Led a full mobile-first redesign, restructuring frontend architecture to align with modern UX/UI and performance best practices.
- Built and maintained e-commerce product pages and checkout flows, optimising for responsiveness, accessibility, and conversion.
- Served as the primary frontend developer, pair-programming with backend engineers and contributing to code reviews and UI/UX decisions.
- Developed reusable templates and components to support a broader theming initiative for a new e-commerce platform.
- Created custom CMS blocks enabling non-technical users to manage content independently.
- Diagnosed and resolved complex frontend bugs using strong JavaScript, DOM, and styling fundamentals.
- Contributed to the early adoption of React and Next.js as part of a transition toward a headless commerce architecture.
